

Product Data Sheet

Product Name: TRI-SOLV ME-NF

Description: Methyl esters (oil-based) based cutting solvent. This product is **extremely biodegradable** and is designed to cut many oils, greases, and even some resins. TRI-SOLV ME-NF contains no fragrance. Excellent for removal of #6 oil, lube oils, paint residues, light creosote residues, etc.

Product Uses & Applications		Application Instructions	
Tank Cleaning		Dilution Rate	Does not dilute with water
Equipment Decontamination		Application Methods	Spray Systems
Line Cleaning		Special Instructions	None.
Vapor Scrubber Systems		Stripping Instructions:	
Rail Car Cleaning		Heating of this product greatly improves stripping of set-up or solid tars and oils. Warm water helps remove this product from equipment and walls.	
Hazardous Information		Packaging Information	
Specific Hazard	Eye and Skin Irritant!	Available Quantities	5,30, 55, and bulk quantities
Flash Point (°F)	Above 220	Packaging Material	Poly
Biodegradability	Good	Other Information:	
pH	N/A for Oils	Do not let product freeze.	
Unusual Hazards	None		
Other Information	None		

Case Study & Application Information (TRI-SOLV Line of Products)

May 28, 2008 Chemical Facility - Houston, TX

TRI-SOLV ME was used to remove tough oil residues from totes that had been sitting for 2 years. TRI-SOLV ME was sprayed into the totes and allowed to soak for 1 day (24 hours). The totes were then taken to the wash bay and heat rinsed with soapy water. When the opened the tote manway they found no residues. They were extremely pleased and wrote the product into their MOC for future cleanouts.

October 13, 2008 Chemical Facility - Pasadena, TX

TRI-SOLV ME was used during a tank cleaning job to remove paraffin residues/oils in an AST. The chemical was injected into the tank via 3D nozzle and through a manway. The product was allowed to soak for 24 hours. The customer went into the tank the next day and rinsed the interior with hot soapy water. The customer was pleased that the job was done in only 4 days versus 2 weeks. The last contractor had issues removing the chemical from the interiors which took time and required more chemical. The use of TRI-SOLV ME saved them over \$6K in chemical alone.
